-587123 23.0 L(2-G2) KIEN= 22.07.76 Mixt. for the mfr. of bricks - contg. dehydrated clay, hydrated nepheline sludge and granulated nepheline sludge *SU-587-123 EXAMPLE
A typical mist. contg. (in wt. %): (I) 5. (II) 80 and (III) 15.
gave bricks with compressive strength of 102 kg/cm² at once after forming, the strength increasing after 28 days in air (water) to 205(208) kg/cm2. The bricks withstand 35 freesing cycles. (2ppi 24) heating to 500-800°C and (II) is obtd. by grinding with water at the solid; water ratio of 3:0, 5, and steaming or %): dehydrated clay (I) 5-40, hydrated nepheline sludge autoclaving. Semi-dry pressing under 150-400 kg/cm² Mixture for the mfr. of building bricks contains (in wt (II) 30-80 and nepheline sludge of specified coarseness (mod. 1.5-2.5) (III) the rest. The clay (I) is obtd. by ylelds bricks which require no further firing or auto-22.07.76-SU-389734 (05.01.78) COAb-15/08 8 KIEV ENG CONS INST 85331~4 claving.
